DETAILED ACTION

1. This action is responsive to communications: Application, filed on 03/19/04.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Cunningham et al., US# 20060064412.

As per claims 1-2, Cunningham et al. teaches "creating the UDT; and activating zero or more underlying operations for the UDT" (see paragraph [0064] and [0095]).

As per claims 3-4, Cunningham et al. teaches "accepting a CREATE TYPE query . . . for each operator element listed . . . activating the corresponding underlying operation of the UDT" (see paragraph [0104]).

As per claim 5, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 3 and is similarly rejected including the following:

--Cunningham et al. teaches "an ALTER TYPE . . ." (see paragraph [0070] and [0107]).

As per claim 6, Cunningham et al. teaches "recording, in a data dictionary, the activated underlying operations for the UDT" (see paragraph [0064] and [0070]).

As per claims 7-8, Cunningham et al. teaches "accepting a query . . . operator that takes one or more operands . . . determining whether the query operator is activated for the UDT . . ." (see paragraph [0010] and [0070]).

As per claims 9-15, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 1-18 and are similarly rejected.

As per claims 16-22, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 1-8 and are similarly rejected.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US# 20050177589; US# 20050044530
